

Little Fishy Dish

Creative Paradise Inc.

Materials:

- [GM217 Fish Texture Soap Dish](#)
- COE96 Glass (See Right)
- Suitable Glass Separator/ZYP
- Frit Placement Tools
- Glass Cutting Supplies

Suggested Glass:

- F2 Fine:
 - Teal Green Trans.
 - Turns Pink Trans.
 - Pale Amber Trans.
 - Black
- Sheet Glass:
 - Standard Thick Clear

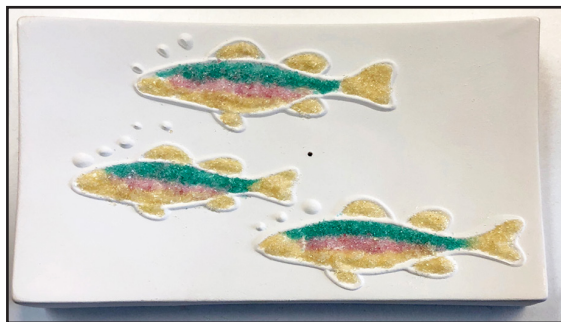

Prepare the mold well with suitable glass separator before beginning. We recommend spray-on ZYP. **If using spray-on separator, make sure to always wear a mask while applying.**

After the separator has dried, begin by placing F2 Teal Green along the backs of each fish. A cut plastic pipette was used here for frit placement.

Add a stripe of F2 Turns Pink along the middle of each fish.

Fill the remaining empty parts of the fish with F2 Pale Amber.

Sprinkle some F2 Black here and there on the fish bodies.

Cut and clean a 5.75" x 3.5" rectangle of Standard Thickness Clear sheet glass and center it on the mold. Move the project to a level shelf in the kiln and fire using the suggested schedule in **Table 1** or your own preferred Tack Fire.

Table 1: Tack Fire*

Seg.	Rate	Temp (°F)	Hold
1	275	1150	20
2	50	1300	20
3	450	1415	10
4	9999	950**	90

**If using COE90, adjust this to 900°F

*Before firing, it's important to know your kiln. For tips on how to do that, [please click here to see our Important Firing Notes!](#)
